## **DETAILED ACTION**

### ***Specification***

1. A substitute specification is required pursuant to 37 CFR 1.125(a) because numerous interlineations or cancellations made in the specification could lead to confusion and mistake during the issue and printing processes.

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

### ***Allowable Subject Matter***

2. Claims 1-4 are allowed.
